

Labcorp LabAlert

An Important Update from Laboratory Services

September/ 2025

Urgent: Critically Low on Troponin I Reagent

On September 2, 2025, Polymedco informed Labcorp at Legacy Health that they would be out of stock of the Troponin I reagent until September 12, 2025 due to significant loss of one of their shipments. Despite exhaustive efforts, Labcorp was unable to secure additional reagent from within the system or a third-party supplier. The hospital laboratories at Emanuel, Good Samaritan, Mount Hood, Meridian Park, Salmon Creek, and Silverton are doing everything they can to conserve reagent until we can get the next shipment, which is expected to be on September 13, 2025. If possible, we are asking healthcare providers to try to conserve where possible as well. We will continue to monitor the situation and provide updates as we get them.

*Labcorp is now the performing and billing laboratory for most Legacy Health lab testing. By combining Legacy Health's history of outstanding service with Labcorp's comprehensive test menu, lab medicine expertise and support capabilities, we are confident that we will build upon the outstanding tradition of delivering high-quality laboratory services to patients in the Portland & Southwest Washington communities.

For additional information, please contact your account representative, client services or consult [the test table](#) on our website.
