

## ***UPDATE: Changes to Rapid HIV Ordering and Reporting***

**Effective June 17, 2025**, Rapid HIV orderables and reporting will change. This testing is performed at Legacy Emanuel, Salmon Creek, and Silverton Medical Centers. No changes to specimen requirements will occur.

The changes are:

- 1.) Orderable and name will change. We currently have two orderables that are identical except for the name. The new test will only have one orderable. Refer to Table 1 for more information.
- 2.) The current test only reports one result for Rapid HIV-Ag/Ab Interp as *Reactive* or *Non-reactive*. The new test will report results for three components. Either *Prelim Reactive* or *Non-reactive* will be reported for HIV-1 p24 Antigen, HIV-1/2 Antibody, and the RHIV Ab/Ag Interp. This change was made to standardize reporting of results across all testing facilities. The interpretive comments were modified slightly to match.
- 3.) Legacy Employee Health will now receive Rapid HIV results both as an automated fax and in Labcorp Link.

<b>TABLE 1: SUMMARY OF RAPID HIV CHANGES</b>		
<b>ITEM</b>	<b>CURRENT (Prior to 6/17/25)</b>	<b>NEW (Starts 6/17/25)</b>
